Trends and Highlights

April 1974

Examination of the statistics shows small decreases in Filing and Communications activities and more substantial decreases in Case Processing and DDO/IP check activities. Most other activities show increases with substantial increases in Indices, Computer Support, Microfiche and Compartmented Information activities. The increase in Indices activities is attributed to the purging of large groups of names from the indices and is not a long term growth trend.

Trends and Highlights

April 1974

1. Clearance Division April 1974 statistics reflect slight declines in overall clearance and security action receipts. Minor increases are noted, however, in the non-applicant staff type category as well as in security access approvals and operational approvals. These declines and increases are of such minor nature as not to indicate a trend during this period.

2. Reinvestigation program case statistics reflect the additional emphasis being placed in this program. In April 1974, a total of 197 cases were put in process constituting an increase of 66 over the previous month.

3. Operational Support highlights of the period included the following:
